

Library Shapers

2023-2025

DYK!

The idea for Library Shapers came from a PGT student suggestion in 2023?

"One recommendation I would make is that you could employ/coordinate student representatives to regularly feedback and be responsible for collecting student opinions on changes being made. This will ensure library services are always acting in the best interests of students when they are planning new services/initiatives for students."

30 students are employed as Shapers at any given time. They are a mix of UG and PGT from all colleges

5/5 in 2025
LLR staff gave full marks when rating how Shapers had helped increase their knowledge & understanding of student needs

over 50 projects have taken place using Library Shaper support

JD reads:
"Evaluate, promote, & co-create services. Work in partnership with LLR staff to inform the future of service delivery."

Which means:
Focus groups, testing systems, resource creation, co-teaching activities, surveying, promotional activities

Which really means:
they help us understand what its like to be student today & create services that are needed
