

Research Data Management: Challenges + Opportunities 2016

The growth and rising importance of research data management (RDM) is a major challenge for libraries and information professionals. This event will explore influences from the sector and real-life experiences from RDM practitioners. It will also be an opportunity to discuss the establishment of a regional forum to share RDM experiences, ideas and innovations.

with talks from leading figures in the field, including:

Professor Stephen Pinfield

*“Research Data Management & Libraries:
Work in Progress”*
University of Sheffield

Ben Veasey
