RDM Launch Event – CADIO Benchmarking Exercise (April 2017)

The following makes use of the DCC Collaborative Assessment of Research Data Infrastructure and Objectives (CARDIO) Tool. It represents the assessment a thumbnail sketch relating regional progress in establishing institutional RDM infrastructure, practices and protocols to date, drawn from 11 Mercian HEIs. Progress is represented by transitioning from left to right (limited to fully enabled).

	1 Envisioning & Initiating	2 Discovering	3 Designing & Piloting	4 Rolling Out	5 Embedding	Average
RDM policy & strategy development	2	1	2	5	1	3.2
Governance of data access & reuse	3	3	4	1	0	2.3
Business planning & sustainability	7	3	0	1	0	1.5
Data management & sharing plans	1	4	2	4	0	2.8
Managing change & RDM service design	4	2	5	0	0	2.1
RDM skills training & consultancy	0	6	3	2	0	2.6
Data access & storage management	2	3	2	4	0	2.7
Data cataloguing & publishing	1	7	1	2	0	2.4
Digital preservation & continuity	2	7	0	2	0	2.3

Each unit above, represents 1 institution.

This exercise is planned to be repeated at a Mercian RDM Support Group event in early 2018.
